

Igniting Human Potential™

We Don't Track Training. We Track **Proof**.

83% of Companies Can't Close Their Skills Gaps.
 We Built the Engine That Can.
Build, Hire, and Grow with Clarity.

WHO WE ARE

SkillSprint™ is a three-part Workforce Intelligence Engine that helps companies **identify, validate, and scale** skills with precision. Unlike an LMS, SkillSprint™ is a proprietary system that verifies skills data, audits workforce capabilities, and drives growth through five core upskilling tools. It doesn't replace your systems—it enhances them, connecting and verifying talent data across your entire HR tech stack.

At SkillSprint™, we address one of the most critical challenges organizations face: unlocking the full potential of their workforce. Our science-backed, proprietary SkillSprint™ Intelligence Engine integrates cutting-edge software technology with an unmatched blended learning approach to skills development. Designed for both enterprise and government clients, our platform delivers advanced solutions for upskilling and reskilling employees, utilizing neuroscience-backed methodologies to optimize performance and drive tangible results.

At SkillSprint™, **We Grow People™**—empowering organizations to cultivate agile, future-ready teams through innovation, excellence, and an intelligence system that stands apart from anything else in the marketplace.

“SkillSprint™ is Revolutionizing the Way Companies Unlock the Potential of their Employees.” - OK! Magazine

“SkillSprint™ is One of Fewer than 10 Black, Female-Led Tech Companies in the Country.” - MSN
